

Our park was designed for your safety.

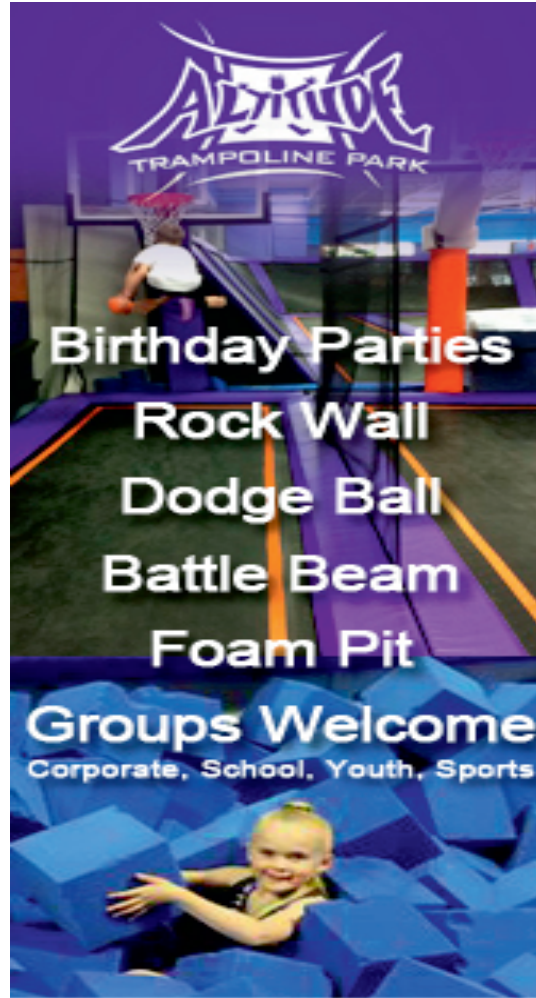

Our soft trampolines are surrounded by strong 8 ft. high trampoline walls. These walls are so strong, jumpers can bounce off of them and back onto the trampoline floor.

Our safety netting is set high enough to contain all jumpers and can withstand up to 150 lbs. per square inch.

Our padding is strategically placed throughout our trampolines and have no gaps to fall through or expose any springs.

Our foam pits contain over 4 feet of soft foam that is placed above a trampoline floor.

Court monitors are present at all times to ensure the rules and safety of every jumper.
